Build-in comfortable handle

Fancy lightweight components

Spinner wheels for stable & smooth glide performance

Silent lightweight wheels with grooves tyres

Rigid internal frame for greater durability

Built to go further

Patent No. ZL 2014 2 0179454.5

3D Frame

Our patented rigid plastic plates on the top and bottom panels make the case very strong, compared to some other lightweight products' frames which easily break.

2 wheels / 4 wheels / 8 wheels options

Fixed securely to inner base plate to ensure smooth manoeuvrability.

Interior

Full lined interior with organizer pockets.

Exterior

Base grab handle for easy lifting.

New Trolley Design

Slim, very strong trolley system design as one piece for smooth retraction".

Tough Outer Fabric

Our polyester double diamond technical lightweight has been quality tested and is ultra-light and very strong. It is backed with foam to enhance the strength and feel, making it ideal for hold luggage.

Key Features

- n Patented top and bottom frame for total rigidity
- n Ultra lightweight components and materials
- n Rigid internal frame for greater durability
- n Reinforced toughened outer material
- n 4 wheel spinner positioned evenly for greater glide and stability
- n New patented single piece, slim trolley design for smooth release movement
- n Bend-resistant pipe frames, designed to withstand impact
- n Easy grip zip pullers with padlock loops
- n Internal flat packing surface benefit
- n Kitelite branding on zippers, handle and casing
- n Comes in a range of colours

Benefits

- n Stronger, lighter, better
- n A unique one-piece frame, strong enough to withstand outer pressure
- n Stronger reinforced material with soft touch cushioning
- n Soft touch handle for more comfort
- n One-piece trolley designed for easy, smooth retraction
- n 4-wheel spinners for stable, smooth glide performance
- n More capacity

Manufacturers and retailers act globally these days. This opens up new markets, but also increases the number of competitors. Complying with, and verification of, relevant safety requirements as well as monitoring specific quality and performance aspects of your products builds a solid foundation for the successful participation in global markets.

To gain a competitive advantage, it is essential to increase your customers' trust and provide them with useful information in the buying process. Independent testing and verification of product characteristics has never been as important as it is today.

Quality, safety, performance, functionality, social responsibility and product reliability are essential selling points. With our independent validation, they will be even more effective.

Highlight aspects of products through independently tested claims regarding:

- n **Safety**
Conformity to national and international standards
- n **Performance & Usability**
Fitness for use
Meets customers expectations
Ease of use, Energie efficiency
- n **Sustainability**
Carbon footprint
Made from recycled resources
- n **Chemical evaluation**
Tested for harmful substances, biodegradable
- n **Mechanical evaluation**
Capacity, burst strength
Flexibility
Scratch resistance
- n **Inspection & Audits**
Factory inspection
Pre-shipment inspection
Corporate Social Responsibility (CSR)
Customer service
- n **Designation of origin**
Made in
Developed/Finished in
- n **Individual claims**
Specific claims can highlight and verify single or unique characteristics of our product
